ANNOUNCEMENT

WE beg to present to you this pamphlet for your inspection. It contains views of a few of the many buildings which have been heated and ventilated by our system. Our idea in publishing this is to establish the fact to those contemplating the installation of a heating, or a heating and ventilating system, that we have had wide experience in this line and that we are capable of undertaking the largest work. You are respectfully referred to the buildings illustrated and many others not illustrated herewith.

We have been intrusted by Architects and Owners with the construction of some of the most important and finest work in this country, and claim that we have made a success of our work, as shown by the illustrated buildings. This is the result of careful supervision of the work and competent and experienced workmen.

We claim for the MURCO VAPOR-VACUUM SYSTEM the following advantages over the old style steam and hot water systems, and are prepared to guarantee same:

1. Simplicity of installation.
2. Noiseless operation. No water hammering.
3. Does away with the air valve, eliminating unpleasant odors from steam.
4. Positive circulation.
5. Simplicity of operation.
6. Saving of Fuel.
7. No packing of valves.
8. No leaking of valves.

MURCO VAPOR-VACUUM SYSTEM

Thirty years of experience in high and low pressure steam heating, hot water heating and ventilating, and the standing which we have secured in this field, are sufficient guarantee of the success of our new development, namely—the MURCO VAPOR-VACUUM SYSTEM.

Although it has been on the market but a few years, a great number of installations have been made in many of the prominent buildings, residences, etc.

The valves and other specialties for use in this system are sold upon a commercial basis. No royalty charges are made for the use of patents covering the valves, or their application to heating systems where our specialties are used exclusively.

We shall be pleased to explain this system more thoroughly, co-operating with Architects and Engineers in the application of a perfect, up-to-date Vapor-Vacuum Heating System for buildings of all kinds, whether large or small.

Soliciting your consideration and patronage, we remain,

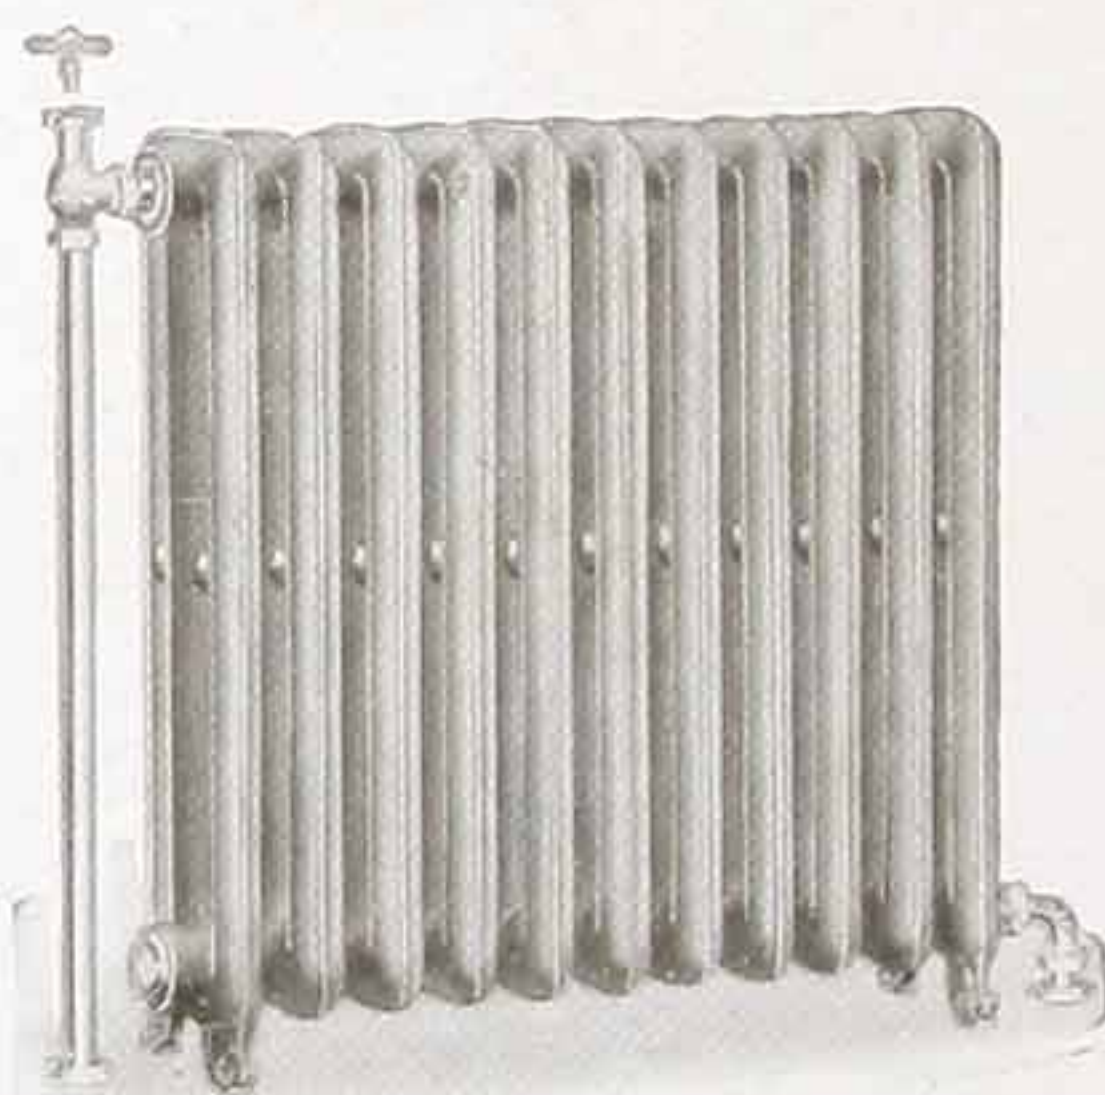

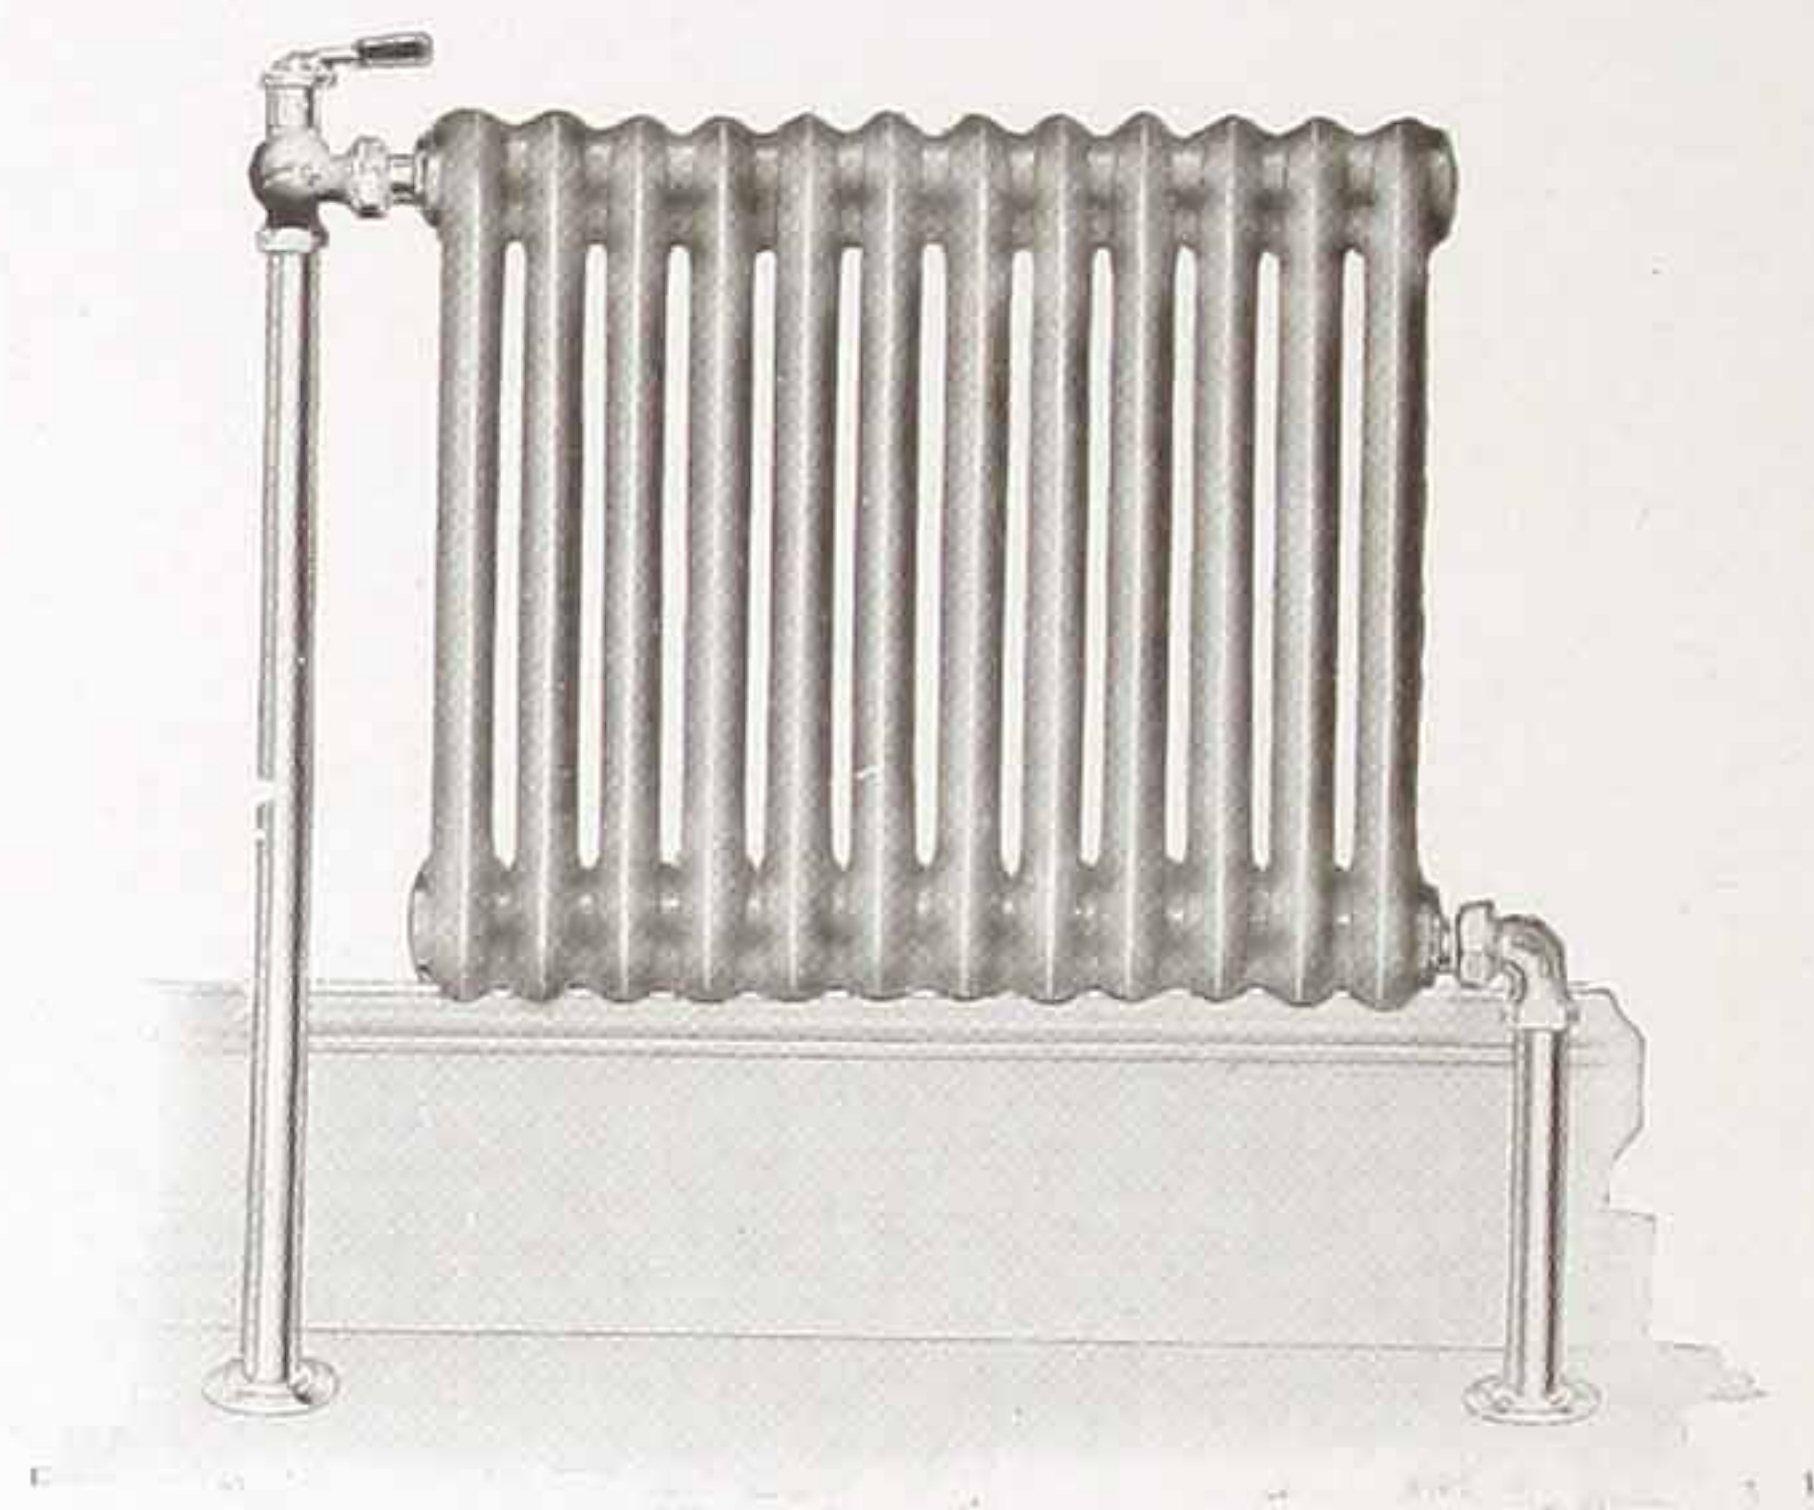

Yours respectfully,

MURCO VAPOR-VACUUM COMPANY,

1619 Sansom Street.

Philadelphia, Pa., August, 1913.
